

RightCard Money Transfer launches on Trusek platform

FOR IMMEDIATE RELEASE

28 JUNE 2016 - Trusek successfully guides RightCard to become a fully-fledged eMoney Institution

London, Thursday 23 June 2016:

Trusek Ltd, the leading software provider powering the Fintech revolution, today announced the launch of RightCard Money Transfer on the Trusek software platform.

This means that RightCard can now offer a speedy, simple, good value and transparent cross border, cross currency funds transfer system for individuals and businesses.

It's based on Trusek's proven multi-currency accounts system.

Steve Hatton, Director at Trusek said, "The Trusek team have experience of the full E-money license application process as well as managing E-money issuing. This meant that we were well positioned to assist RightCard through their application process, ensuring approval was granted within the minimum timeframe. We were very pleased with the outcome and I would like to congratulate the RightCard team on a successful launch."

Mauricio Barbosa, Owner of RightCard said, "I previously worked with the Trusek team when I was Director of Alpha Transfers Limited, a London based Remittance Company. My experiences then gave me the assurance I needed that Trusek was the right partner for us. I first contracted them to consult with us on the FCA IT Controls, which was a major part of our application process to become an Authorised Electronic Money Institution."

Barbosa continued, "With the help and guidance of the Trusek team we successfully completed our application process with the FCA and RightCard is now a fully-fledged eMoney Institution."

The Trusek platform has previously been deployed by FCA authorised companies and their agents.
